

## Wraprotor A6200 Bulk Feeder Accessory

**With the new Bulk Feeder Accessory, the Wraprotor A6200 Wrap Printer Applicator just became even more awesome to automate cable & wire identification in cellular manufacturing**

- Dramatically increases high volume automated cable & wire identification thanks to fewer label roll changes
- Automates cable & wire identification to 7 seconds per identified cable, increased label placement accuracy and reliability, and reduces cost in cellular manufacturing environments
- Compatible with wire and cable diameters from 1.19 mm to 6.35 mm

### Increased ease of use

#### **Dramatically increased efficiency for high volume cable identification**

With the introduction of a bulk roll holder and bulk label rolls for the Wraprotor A6200 Wire Identification Printer Applicator we are further increasing the efficiency of cable identification. Using bulk label rolls will reduce time spent on replacing label rolls and generate additional efficiency, especially when identifying cables with the same label type. At the same time, less waste is generated.

The Bulk Feeder Accessory can be mounted easily to the A6200 housing without the need for additional tools or lengthy tutorials. You will be ready to increase efficiency in no time!

### A complete cellular manufacturing tool

With this additional capability the Wraprotor A6200 Wrap Printer Applicator is now more than ever a tool of choice to achieve automated efficiency. The system prints and applies labels in a single step, saves loads of time and has the perfect size for smaller, cellular workspaces.

- Prints and applies labels to a wide range of wires in less than seven seconds
- Offers minimal and fast material changeovers for added efficiency
- Enables cellular manufacturing workflows due to its compact size and easy set-up
- Includes a full-colour responsive touch screen and an easy, icon-based user interface

- Offers industry leading connectivity with three USB ports, Wi-Fi option and 32GB of internal memory to store label print jobs
- Ships with Brady Workstation Product and Wire ID Software Suite with built-in templates for fixed text or free-form label design options

## Bulk Feeder compatibility

**A6200s delivered since February 2023 are directly compatible with the A6200 Bulk Label Roll Adapter. We are not changing the price of the A6200, nor is there any change in performance.**

- A6200s sold prior to February 2023 can easily be upgraded to the new version to be compatible with the bulk roll adapter.
- The upgraded version can be recognised by the slot for material feeding into the back of the printer and by the mounting points for the adapter. (see picture)
- Get in touch with your Brady Service contact to easily organise A6200 upgrades.

## Product data

The following hardware part references are being introduced:

New Art. Nr.	Description
176478	Wraptor A6200 EU WIFI and Rewinder Kit
176480	Wraptor A6200 EU
176479	Wraptor A6200 EU WIFI
170976	Wraptor A6200 Bulk Label Roll Adapter

These printer references started shipping in February 2023. The bulk roll accessory is now available from stock.

All references will be added to Product Discount Group BW: Propr. Autom. Syst. (Proprietary Automation Systems) except for the Bulk Label Roll Adapter which will be added to AJ: Spare Parts and Accessories.

These are the bulk label rolls references:

New Art. Nr.	Description
170977	BA62-1-427
170978	BA62-14-427
170979	BA62-11-427
170980	BA62-15-427
170981	BA62-2-427
170982	BA62-3-427
170983	BA62-4-427
170984	BA62-1-417
170985	BA62-14-417
